State Energy Data System CSV File Documentation

Energy Source Tables

These comma-separated value (CSV) files contain estimates included in the State Energy Data System (SEDS) consumption, price, and expenditure tables located on the SEDS web page at http://www.eia.gov/emeu/states/_seds_updates.html.

There is a CSV file for the most recent year's data for each energy source as shown in the HTML and PDF data tables. In some cases there is one data file for two tables. In addition, there are CSV files that contain estimates for all States and years.

The first record in each file contains the column headings. The first data field is the State code (2 characters), followed by the data identifier (5 characters), and then the estimates arrayed by years. Estimates for consumption are available as from 1960; estimates for prices and expenditures are available as from 1970. All fields are separated by commas. All fields are enclosed in quotes, which mean some systems will read numeric values as alphanumeric unless they are converted. Detailed descriptions of the State codes, data identifiers, and units are listed in the latter part of this documentation.

While the estimates shown in the PDF and HTML tables are rounded, the estimates in these CSV files are in the greatest precision contained in the SEDS database and expressed with five decimal places with explicit decimal points included in the numeric fields. However, the precision does not necessarily reflect the statistical accuracy of the numbers. Users should see the sources cited in the SEDS Consumption Technical Notes as well as the SEDS Price and Expenditure Technical Notes for a discussion of estimation methodologies for specific data series.

The data files contain additional data series not shown in the report tables that have frequently been requested by customers. These additional data include the individual "Other Petroleum Products" used in the industrial sector, the breakout of natural gas used as lease and plant fuel, and the breakout of types of jet fuel in the transportation sector.

To fully understand and utilize the data files, customers should read the documentation in the Technical Notes available at: http://www.eia.gov/emeu/states/_seds_updates_tech_notes.html.
